# About ProProcessor

We are a full line Meat Processing Distributor that grew out of a general merchandise company that has been supplying the needs of its customers since 1920. We started selling food processing equipment at that time, but now we have found that there is a real need all over the country for food processing equipment at more affordable prices. Food processing companies have enough expenses in complying with government requirements than to pay outrageous prices for good equipment. We have done something about that!

ProProcessor is in Frelsburg, Tx, centrally located in the country which allows us to offer lower freight rates to many of our customers.

You may notice that some of our products look similar to other products in the marketplace but we have customized most of our products to be more useful and durable compared to similar products offered by our competitors.

We want your business and will work hard to provide exactly the equipment that you need - at a price that you can afford!

Prices are subject to change without prior notice. Please call us before ordering to verify current prices. Also, you can check out our website for current pricing.

Most Truck Shipments 2-4 Days!
